**OVERHEAD DOOR INTRODUCES DESTINY™ 1200 RESIDENTIAL GARAGE DOOR OPENER**

*New Opener Designed for quiet and powerful operation, speed and additional security*

**DALLAS** (2010) – Overhead Door Corporation, a leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications, today announced the introduction of the Destiny™ 1200 garage door opener. The Destiny™ 1200 opener features a powerful 3/4 HPc\* Power Plus DC motor and belt or chain system that provides homeowners a remarkably quiet, fast, strong and reliable performance.

Also designed for convenience and security, the Destiny™ 1200 features a bright 200 Watt lighting system and a Safe-T-Beam® system that stops and reverses the closing door if an object passes through the infrared beam. The opener's CodeDodger® Access Security System activates a new access code from billions of combinations each time the remote control is used to prevent piracy of the radio signal that opens the garage door. Additionally, the wall console included with the opener features a light activation button and a vacation lock that can restrict operation of the garage door opener when needed.

For easy installation, The Destiny™ 1200 offers electronic limit setting and simplified programming. Its 3/4 HPc\* Power Plus DC motor has ample power to operate the heaviest garage doors quickly. It also has a soft start and stop, resulting in less wear and tear on the garage door. There are many accessory options available for the Destiny™ 1200 garage door opener, and it is compatible with HomeLink® and Car2U® in-car universal remote systems.

-more-

The Destiny™ 1200 will be available through Overhead Door's nationwide network of Ribbon® distributors in (Month) 2010.

\* Designates that it exceeds Overhead Door's lifting force specification for 3/4 horsepower garage door openers

### **About Overhead Door Corporation**

Overhead Door Corporation, based in Dallas, Texas, is a leading manufacturer of overhead doors and openers for residential, commercial and industrial construction applications. There are three divisions of the company, including the Access Systems Division (ASD), the largest, which features the Overhead Door, Genie® and Wayne-Dalton® brands; Horton Automatics, which includes automatic pedestrian entrance systems; and TODCO®, the largest producer of overhead doors for the transportation industry worldwide. Overhead Door created the original overhead garage door in 1921 and the first electric garage door opener in 1926. Overhead Door Corporation is a subsidiary of Sanwa Holdings Corporation of Tokyo, Japan. For additional information, visit **[www.overheaddoor.com](http://www.overheaddoor.com)**.
